▼"Base Method Defaults" (string, default = "SA")

Select the default method type which also sets parameter defaults in the sublist "ML Settings"!

Valid strings	Description
"none"	Do not set any default parameters
"SA"	Set default parameters for a smoothed aggregation method
"DD"	Set default parameters for a domain decomposition method
"DD-ML"	Set default parameters for a domain decomposition method special to ML
"maxwell"	Set default parameters for a Maxwell-type of linear operator
